

Lesson Plan — The French Revolution

History | Class 9 | The French Revolution | Difficulty: introductory

Total periods: 2

The two-period structure is ideal for an introductory Class 9 history topic on the French Revolution. It neatly divides the source material into a foundational session on causes and origins followed by a second session on impacts and global democratic applications.

Period 1: Causes and Origins of the French Revolution (45 min)

Objectives

- Understand the timeline and background of the French Revolution beginning in 1789
- Identify the primary causes including the fiscal crisis, inequality under the Ancien Regime, and Enlightenment ideas

Concepts: Causes of the French Revolution

Forty-five minutes allows sufficient time to introduce the historical context of 1789 and break down the complex socio-political causes such as the Ancien Regime and Enlightenment ideas without cognitive overload.

Period 2: Impact and Global Legacy of the French Revolution (45 min)

Objectives

- Examine key documents such as the Declaration of the Rights of Man and of the Citizen
- Analyze how the Revolution abolished feudal privileges, challenged absolute monarchy, and influenced later democratic movements

Concepts: Impact of the French Revolution

A dedicated second period allows students to focus entirely on the outcomes, key documents, and global applications of the revolution, moving logically from causes to effects.
